

SPEAKMAN

SHOWERING

WHAT SETS US APART?

HISTORY OF SPEAKMAN®

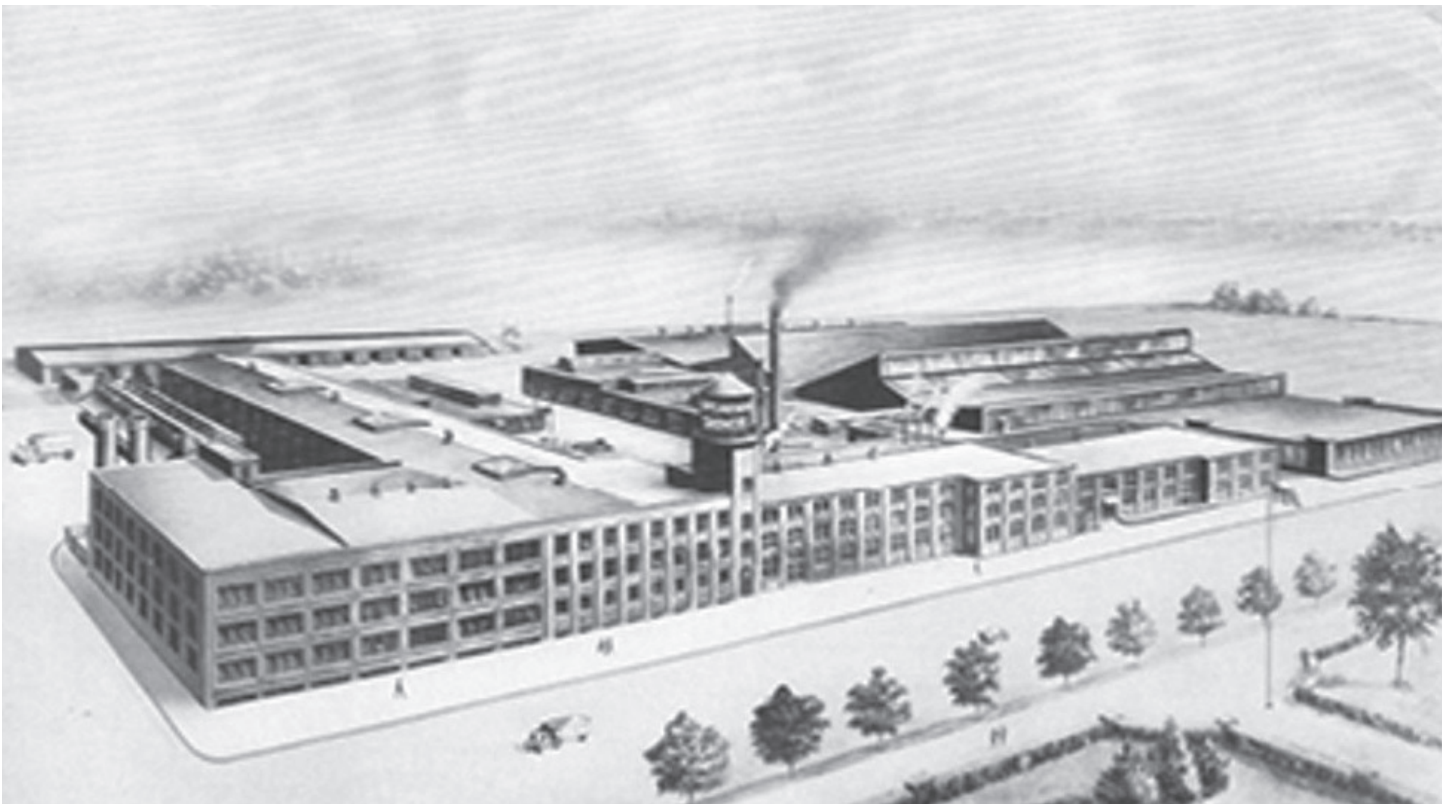

Speakman is a brand with a long and notable history in shower innovation.

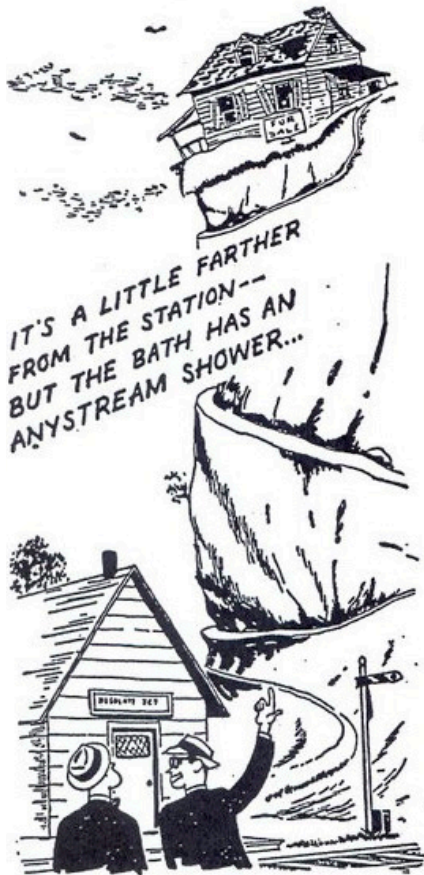

The company was founded in 1869 by brothers Allen and Joseph Speakman from Wilmington, Delaware. From the early days, the goal was to craft genuine timeless fixtures that deliver superior performance, never compromising on quality. That hasn't changed until today.

The brothers ended up creating the world's first adjustable shower head, the Anystream® showerhead in the early 1920's. Since then the company has earned over 100 patents for design and innovation and has become the premier shower head brand in luxury hotels around the globe. Speakman popularized the shower as we know it today and continues to focus on performance, craftsmanship, and the stewardship of water as our most precious natural resource.

An uncompromising focus on engineering excellence has earned the brand a reputation for superior quality and enduring design, from showerheads and designer-inspired bath collections for the home to fixtures for the hospitality industry and safety products for commercial, laboratory, and industrial environments.

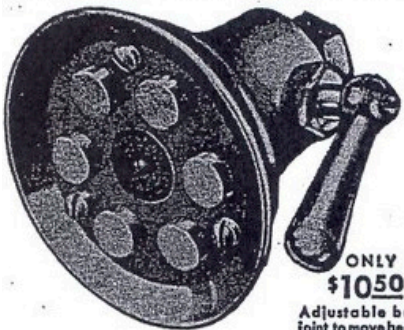

A lot has changed since 1869, but our passion to innovate has only grown. Over the years, our team has remained small by design to focus on what we do best. Our techniques have been inherited from past generations. From the design desk to the work bench, each and every item we create continues to be proudly engineered in Glen Mills, PA.

Pure luxury... that's an Anystream!
 Flick the handle for any spray you like. Get an adjustable, self-cleaning Speakman Anystream Shower Head for your shower. Screws on in a jiffy. At plumbers and dealers. Or write us direct.

THE SPEAKMAN® DIFFERENCE

Being a good steward to the environment is one of the fundamental values Speakman stands by. This is reflected in how we operate as well as in our products. Today, every plumbing manufacturer offers water-saving products. But they are not all the same. At Speakman, our team of shower experts honed in on three specific areas to create eco-friendly products that are proven to save water without sacrificing an ounce of performance: improved thermal retention, spray force, and consistent coverage.

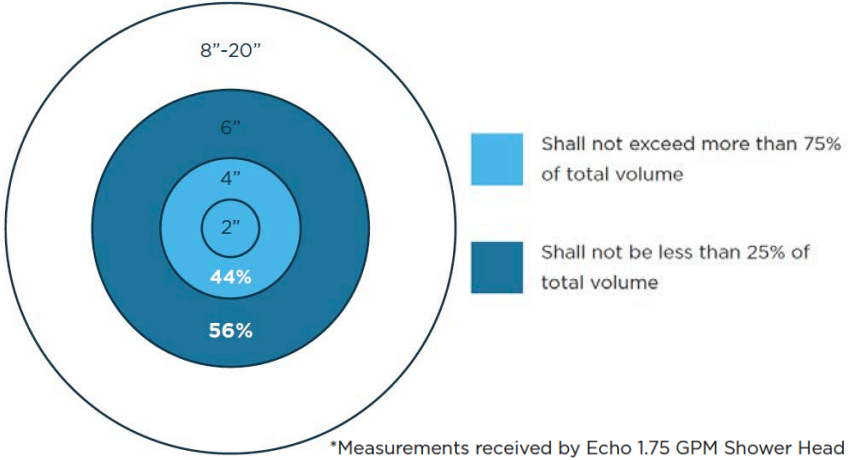

THERMAL RETENTION

Speakman shower heads have superior thermal retention, meaning the water sprays will retain temperature longer than competitor models as the water flows from the shower head to your body. Apart from delivering an overall better shower experience, thermal retention also helps save energy costs because you use less hot water. We measure thermal retention against the Australian/New Zealand Standard AS/NZS 3662, which states that there can be no more than a 5.4°F change in temperature over a 24" span. Currently, tests or requirements like these do not even exist in the United States.

SPRAY FORCE

Since our founding days in 1869, we've defined a great shower as one that delivers a powerful performance and intense experience. That's why our engineers spend a significant amount of time developing unique engines and technology. Instead of using air-infused sprays, our technology actually enhances water pressure, resulting in a more vigorous, energizing experience. Plus, we measure spray force in accordance with WaterSense to ensure sprays shall not be less than 2.0 ounces at the inlet when water is flowing.

SPRAY COVERAGE

Our engineers meticulously examine the placement of every nozzle and jet to ensure not a single spray intersects. They do this because our goal is not just to deliver full coverage and drenching experience but for the user to distinctly feel every single water droplet. To assess this, we measure the spray radius using annual gauges to capture the distribution of water against the requirement set by WaterSense, which states that 25% or more of the total water volume needs to be in the 2-6" diameter range and no more than 75% can be in the 2-4" diameter range.

FLOW RATE

Overall, our goal is to make sure that Speakman shower heads deliver the maximum force at every flow rate, regardless of how strong the water pressure is. To achieve this, we adapted our specifications to provide a higher performance version of the flow control used in our shower heads. To meet WaterSense criteria, shower head flow output cannot perform below 80% of the stated maximum flow rate. Today, all of our shower heads perform at 90% of the maximum flow rate, which optimizes your flow rate at every pressure range to deliver the most powerful yet water-saving performance possible.

Since our founding days in 1869, we've defined a great shower as one that delivers a powerful performance and intense experience. That's why our engineers spend a significant amount of time developing unique engines and technology. Instead of using air-infused sprays, our technology actually enhances water pressure, resulting in a more vigorous, energizing experience. Plus, we measure spray force in accordance with WaterSense to ensure sprays shall not be less than 2.0 ounces at the inlet when water is flowing.

Features:

Featuring a solid brass construction and our patented Anystream technology, the Icon Shower Head has precision jets that transform water into 64 spray channels. The sculpted arm transitions effortlessly through fully adjustable spray patterns from full body needling to gentle rain rinsing and drenching full flood sprays. The 360-degree rotation also results in self-cleaning, ensuring each stream is delivered at its intended pressure, every time.

The Icon's sleek, compact frame is designed to optimize water pressure, resulting in an all-around exhilarating showering experience that's truly memorable. Its solid brass construction and corrosion-resistant finish ensure the Icon will last and maintain its look over time. The Icon Shower Head features a WaterSense-certified 2.5, 2.0 and 1.75 GPM flow rate.

Speakman's line of Exhilaration Shower Heads is guaranteed to deliver an unrivaled shower with multiple experience options. It combines the patented Speakman Reaction spray setting with a multi-function shower head that features four spray patterns:

- Reaction delivers a powerful full body spray
- Satin offers a gentle spray that leaves skin feeling cleansed & refreshed
- Inner massage provides a forceful, concentrated spray to sooth muscles
- Rain provides a full coverage drenching spray

Features:

Exhilaration Shower Heads are guaranteed to deliver the best shower experience you have ever had. Users can now experience the patented Speakman Reaction spray setting in a multi-function shower head. This multi-function head features four spray patterns: the Speakman Reaction, satin spray, center massage, a rain spray, and a pause mode. All flow rate options are WaterSense certified with 2.0 GPM, 1.75 GPM, and 1.5 GPM flow rates available.

To ensure longevity and reduce calcification the shower head drains completely after each use. Exhilaration shower heads are available in 2.0, 1.75 & 1.5 GPM flow rates are available and WaterSense-certified.

The tap water in many parts of the country contains significant amounts of chlorine that's added to kill disease-causing bacteria and viruses. It is widely considered safe as it is kept under certain levels, but it could be wreaking havoc on your skin and hair, making it dry and susceptible to damage. Chlorinated water mixed with certain personal care products can potentially even create more hazardous byproducts.

Features:

Featured in luxury resorts around the globe, the Speakman Hotel Shower Head is known for its legendary performance and unrivaled quality. Equipped with 50 full-coverage sprays and 8 center massage jets - this fixture is engineered to deliver a truly satisfying experience. By rotating the side handle in either direction, you can easily transition between Intense, Massage and Combination spray patterns.

Preventing all of these issues, Speakman has engineered a revolutionary product designed specifically to remove chlorine from your shower experience to keep skin and hair soft and smooth: The Hotel Pure Filtration Shower. This innovative product combines the iconic Hotel Shower Head design and engineering with the latest water filtration technology - resulting in clean, pure shower water. The copper-zinc alloy filter is proven to remove and convert up to 99% of chlorine, providing an enjoyable and healthy shower. In addition, the filter also removes chlorine, heavy bacteria, dirt and metals.

The Speakman Hotel Pure Replacement Shower Filter is designed to keep your water clean and healthy for up to 6 months or every 10,000 gallons used. Compatible with our Hotel Pure Filtered Shower Head, our shower filters feature a unique media blend that is proven to remove up to 99% of the chlorine from your shower water. To replace your shower filter, simply twist the lock mechanism on your Hotel Pure Shower Head, remove the existing filter, replace it with your new filter, and lock the mechanism back into place.

LUXURY HOTELS PREFER SPEAKMAN® SHOWER HEADS

Luxury travelers are among the most discerning consumers. They have exceedingly high expectations on their accommodation, especially when it comes to the bathroom and the showering experience. It is not surprising that luxury hotels have a rigorous selection process when it comes to choosing a showerhead for their bathrooms.

The fact that Speakman is a long-standing trusted partner of many global hospitality businesses underscores not just the quality and reliability of our shower heads, but also the exceptional shower experience it provides, which many travelers try to emulate at home.

PREMIER HOTEL PROPERTIES FEATURING SPEAKMAN® SHOWER HEADS

HOTEL ANYSTREAM SHOWERHEAD

“A high-quality choice for new construction or a replacement wall-mounted shower head. This premium high-flow shower head’s clean lines and sleek, simple design will enhance and complement any modern bathroom.”

Southern Living

ICON SHOWERHEAD

“This Self-Cleaning Shower Head Fixed My Low Water Pressure In Seconds. It’s basically made for low-pressure showers. Using something called “patented plunger technology,” the shower head jets out 48 high-pressure streams up to 2.5 gallons per minute.”

dwll

ICON SHOWERHEAD

“Speakman’s signature silhouette, updated with modern contours. Featuring a solid brass construction and our patented Anystream technology, the Icon S-2251 Shower Head has 8 precision jets that transform water into 64 spray channels.”

Bustle

ICON SHOWERHEAD

“This little shower head makes lower pressure lines work twice as better and looks beautiful to boot. It weighs a substantial amount and works beautifully. Super easy to change and looks beautiful!”

Clean4Happy
PRODUCT REVIEWS

ICON SHOWERHEAD

“The Speakman S-2251 is solid brass and has eight adjustable jets with a 2.5 GPM flow rate. There are lower flow rate models available. The self-cleaning plungers mean you don’t have to worry about mineral build up. The solid metal design means no cracking plastic or leaks from plastic failure. That’s worth the investment.”
